" Good Book-keeping to a man of business is equal to one-half of his capital."

Mr. COMMISSIONER FONBLANQUE, of the Court of Bankruptcy, London, (whose opinion in this matter is entitled to the greatest weight, says:—" Good Book-keeping to a man of business is equal to one half of his capital. I find that—which I take every opportunity of declaring—is the best proof of honesty, namely, thorough good Book-keeping. I am sure I come to the right conclusion in laying down that Book-keeping is at the very foundation of sound trade."

DAY'S COMMERCIAL COLLEGE,

(ESTABLISHED IN 1864.)

No. 82 KING STREET EAST,

(FIRST DOOR EAST OF WESLEYAN BOOK ROOM.)

TORONTO.

GUIDE BOOK

OF THE

CITY OF TORONTO,

AND EXHIBITORS AND VISITORS' HAND-BOOK.

TORONTO, the metropolis of the Province of Ontario, is a city demanding more regard from the travelling stranger, and justifying a higher degree of satisfaction in its inhabitants than may be accorded to its magnitude, or to the years of its age. It is too young to have many traditions or much venerable history, yet it has some. It might be looked to as the central subject of a long history were a writer to diverge into the annals of the Province, of which it is the Seat of Government. It is the place of residence of the Lieutenant-Governors of Ontario, the Seat of Legislation, of the Courts of Justice, of Education, and the centre of Western Commerce.

In 1793, besides the old French fort built in 1686, it contained no other human habitation than the rude wigwams of the migratory Indians, and then not many of these. When the census was taken in January, 1861, the official return was 45,166. By natural increase and immigration it may be estimated in 1870 as close upon 70,000.

This beautiful city extends between east and west over two miles, bounded on the south by the Bay, a spacious inlet from Lake Ontario, and stretching northerly about a mile and a half, including open spaces at the extremities, terminating with Yorkville, on the undulating heights, and more westerly, limited by the Queen's Park, where stand the University and Observatory, with handsome private residences, among the picturesque woods, at an elevation from one hundred to two hundred feet above the level of the Lake. Taking the site of the Observatory as the geographical position of Toronto, the city occupies a spot of the globe on the north-west angle of Lake Ontario, in $43^{\circ} 39' 4''$ North Latitude, and $79^{\circ} 21' 5''$ West Longitude; or 5 hours, 17 minutes, 20 seconds of time slower than the clock at Greenwich Observatory, six miles from Charing Cross, London, England. Toronto is distant from Niagara Falls, by direct line across the lake and the mouth of Niagara river, 50 miles; from Collingwood at the north terminus of the Northern Railroad, on Georgian Bay, Lake Huron, 98 miles; from Hamilton, 45; London, 114; Kingston, 165; Ottawa, 233; Montreal, 323; Quebec, 503; New York, 500; Boston, 593.

The beach at Toronto, which nearly encloses the Bay from Lake Ontario, is a barrier of gravel and sand. It has accumulated by the wedging of ice into an angle of the shore, where the water freezes, being there comparatively shallow. Against that ice, through long ages, Lake Ontario, too deep to freeze, has surged up in the tempests of winter, depositing a wall of shingle transferred from its own bottom. Another beach formed in like manner, encloses Burlington Bay at the western extremity of the lake, five miles from the city of Hamilton.

Bouchette, in his work on the Survey of Canada, published in 1832, describes the harbour and site of Toronto as he saw the locality in 1793, thus :—"I still distinctly recollect the untamed aspect which the country exhibited when I first entered the beautiful basin which then became the scene of my early hydrographical operations. Dense and trackless forests lined the margin of the lake, and reflected their inverted images in its glassy surface. The wandering savage had constructed his ephemeral habitation beneath their luxuriant foliage,—the group then consisting of two families of Mississagas ; and the bay and neighbouring marshes were the hitherto uninvaded haunts of immense coveys of wild fowls ; indeed they were so abundant as in some measure to annoy us during the night. In the Spring following, Lieutenant-Governor Simcoe removed to the site of the new capital, attended by the regiment of Queen's Rangers, and commenced at once the realizations of his favourite project. His Excellency inhabited, during the summer and through the winter a canvas house, which he imported directly for the occasion ; but frail as was its substance, it was rendered exceedingly comfortable, and soon became as distinguished for the social and urbane hospitality of its venerated and gracious host, as for the peculiarity of its structure."

From 1793 till 1854 the Seat of Government was in Canada an unsettled question ; the people of Newark in the first-named year, were troubled with the subject ; they being in possession desired the Government to remain where it was. Governor Simcoe decided that it should be at York, yet only temporarily until the West should be settled and London built. Lord Dorchester the Governor-General thought Kingston the proper place. In 1795, the retirement of Lieutenant-Governor Simcoe from Upper Canada led the inhabitants of Newark to hope that the projected removal of the Seat of Government would not be carried out.

The name Toronto was superseded by that of York about 1794, and by Act of Parliament it displaced York in 1834. It is found in Canadian French documents as early as 1686, and if it be of Indian origin, its antiquity extends beyond memory. Ouentorouk is given as one of the native names which, says the Rev. Dr. Scadding, may have been gradually rubbed down in passing from trader to trader to Toronto. Two favourite interpretations have been "trees rising out of the water," and the "place of meeting." Others have suggested the word "Toronto" to be a perpetuation of the French engineer who constructed the fort in the years 1750-52, but the fort and French habitations within were named Rouille, in compliment to the Colonial Minister of France, who authorized its construction.

The public buildings of Toronto which first attract the eyes of strangers are the Churches, with tall tapering spires. The umbrageous avenues leading to the Park carry the visitor to the University and Observatory. Trinity College, Upper Canada College, Knox College, Model School, the Parliament Buildings, Lunatic Asylum, the New Prison, St. James' Cemetery, and Necropolis, attract notice ; and the General Hospital for its widely beneficent utility demands admiration ; St. Lawrence Hall is massive and commodious ; the City Hall, near it, serves the Corporation with a place of assembly and City offices ; St. James' Cathedral, the towers still unfinished, St. Michael's, Zion, Knox's Churches ; the Music Hall, Masonic Hall, and Post Office, Mechanics' Institute, and further to the west, Osgoode Hall, the structure in which the higher Courts of Law, and the practising lawyers assemble ; these and many more, together with banking houses, manufactories, merchants' warehouses, spacious hotels, long extended lines of wharves, with piers abutting into the bay, and the bustle of commerce from sailing and steam vessels, and the several railways,—all stand out grandly contrasted with the Indian wigwams of 1793 ; or with the village character which attached to Toronto for a space of forty years. After it had become the Capital of Upper Canada, the backward condition of Toronto during the first forty years of this century, was du

CLASS OF PROPERTY INSURED.

MERCANTILE BRANCH.

All property of a class not specially hazardous will be insured by this Company, including Stores and their contents, Dwelling Houses (not included in the Household Branch) and their contents, and City, Town, and Village Property generally. Also, Country Stores, Taverns, Flour Mills, &c., &c., &c. The rates of Insurance will be on the lowest scale of Mutual Insurance Companies.

Parties insured in either Branch are exempt by law from all liability for losses sustained in the other Branches.

Cost of Insurance in this Branch averages about two-thirds of the usual proprietary rates, as no profits are required.

This Company has authority under the Statute 27 and 28 Victoria, cap. 99, to issue Policies of Insurance on

LIVE STOCK.

Applications will be received through any Agent of the Company, for Insurance against death from any cause, of Horses, Bulls, Oxen, Steers, and Cows.

HOUSEHOLD BRANCH.

Non-hazardous Household Property will be insured for three years or less, on which a Premium Note averaging from 1½ to 4 per cent. will be taken, of which a small sum must be paid in Cash at the time of insuring, and endorsed on the Note.

FARMERS' BRANCH.

Country Dwelling Houses, isolated, with the Household Furniture, &c., contained therein. Also, Barns and Outhouses, and Farm Produce; Hay and Grain in Stacks; Horses and other Cattle, Waggon, Sleighs, and Harness; and Farm Implements and Machines generally; Churches and School Houses, not situated in cities, towns or villages, and isolated from all other buildings.

Agents of this Company are not allowed to charge any fee for Application or Survey.

W. T. O'REILLY, }
H. HANCOCK, } JOINT SECRETARIES.

not alone to its youthfulness and want of resources, but to the ambition of its earlier inhabitants to make their families the first in lineage of a grand land owning aristocracy. To secure that future greatness they took wild lands into possession which they did not clear and cultivate; consequently roads were not made, so that populous rural districts might sustain a thriving city. To this day many valuable water privileges are sealed up from public use in various parts of Canada, their proprietors enslaved by ambitious or sordid considerations. Most of the speculators in land hold it, to have it hired from them by tenant-farmers, in hope that they may in time have a large rent-roll, and meanwhile those tenants to clear the land and build the barns. Or, they hold uncultured land awaiting the settlement of small proprietors near it, who by their industry will give value to the estates of speculators who are ambitious and greedy without industry. It was the wide prevalence of such practices, together with the assumption of exclusive political functions and offices in the families possessing the largest domains of wilderness, that led to the insurrection of 1837. The Government has been popularized since then. The Executive is responsible to the people, but no liberal system of inducing a large immigration to seek Canada for a home in preference to the Western States has been yet adopted in practice. The development of our railways is tending more and more every day to correct this mistaken policy.

EDUCATIONAL INSTITUTIONS—LITERARY SOCIETIES.

Toronto being the fountain-head of the Canada School System, now as widely useful and as perfect as any in the world, a sketch of the Educational Institutions of the city may give the reader pleasing ideas of Provincial progress.

THE NORMAL AND MODEL SCHOOLS.

In 1836, Mrs. Jamieson, a writer favourably known in British literature, resided for a time in Toronto, and urged on the Canadian public the establishment of Common Schools; and, as auxiliary to these, a Normal School for the training of Teachers. In a book afterwards published, that lady animadverted severely on the apathy of Canadian public men in relation to that subject. The subject of a Normal School, as necessary to completion of a National system of education, engaged public attention in 1836; but nothing was accomplished until after the appointment, in 1844, of the Rev. Egerton Ryerson as Chief Superintendent of education. A bill which he drafted became law in May, 1846, and in July of that year the Board of Education (subsequently termed Council of Public Instruction) was appointed for the purpose of establishing the Normal and Model Schools and selecting text-books for the schools of the Province. The Old Government House was opened as the school on the 1st of November, 1847. On the removal of the Seat of Government from Montreal to Toronto, in 1849, measures were taken for the immediate erection of buildings for the Institution. The Legislature, in 1850, appropriated £15,000 for the purchase of a site and erection of buildings, and an additional £10,000 in 1852. The corner-stone of the new buildings was laid by the Governor General, the Earl of Elgin, 2nd of July, 1851, and the premises were formally opened on the 24th Nov., 1852.

The Institution consists of a Normal School and two Model Schools—the former the school of instruction by lecture, the latter the school of instruction by practice. The students in the former are young persons whose ages vary from 16 to 30, or over; while the pupils in the latter are children of ages between 5 and 16 years. In the Normal School the teachers in training are instructed in the principles of education, and the best methods of communicating knowledge to the youth placed under their care; they

are taught how to teach; and in the Model Schools they are taught to give practical effect to those instructions under the direction of teachers previously trained in the Normal School. The Model Schools are designed by the system of instruction pursued, and by general arrangement, to be the model of all the Public Schools of the Province.

The building is situated on the centre of an open square measuring seven and a half acres, on elevated ground, distant from the Bay about three quarters of a mile.

MUSEUM.—In connection with the Model School is an Educational Museum, containing specimens of school apparatus and furniture, a collection of Italian, Dutch and Flemish oil paintings, and statuary, casts and busts. This Museum is freely open to the public.

PUBLIC SCHOOL LIBRARIES. Their head-quarters Depository is in the Normal School buildings. Each School and Municipal Corporation desirous of establishing Free Public Libraries is aided by the Educational Department granting one hundred per cent. on local appropriations, and by supplying books from the Depository. At the end of 1863 the Libraries, in that way established, numbered 576, with over 1,200 sub-divisions, and containing 205,122 volumes.

The whole number of Educational Institutions reported open in Upper Canada in 1863 was 4,588; the pupils attending them numbered 375,533; the sum of \$1,803,493 was expended in their support.

GRAMMAR SCHOOLS.—These act as a connecting link between the Common Schools and the University, and are designed to give instruction in the branches of a practical English and commercial education, including the elements of Mechanics and Natural Philosophy; and also in the Greek and Latin languages, and in Mathematics, so far as to prepare students for University College, or any College affiliated to the University of Toronto.

THE UNIVERSITY OF TORONTO.

The University of Toronto was established by Royal Charter, dated 15th March, 1827, and was styled "King's College" on 3rd January, 1828. It was endowed by Patent, with a grant of lands which, at the request of the Parliament of Upper Canada, had been set apart by the Crown for that purpose in 1798. In 1843, the arrangements having been completed for opening the University, the formal inauguration of the Institution and first admission of students took place on the 8th of June of that year, and its first Convocation on the 14th of December, 1844. In 1849 the Parliament of Canada, in compliance with the Imperial recommendation "to consider in what manner the University could be best constituted for the benefit of the whole society," abolished such restrictions as made agreement with the Thirty-Nine Articles of the Church of England compulsory on professors and the holders of scholarships, changed the name from "King's College," and enlarged the powers of Convocation under the title of the University of Toronto. In 1853, Parliament, by an Act, separated the functions of the University from those assigned to it as a College.

The University buildings occupy a charming situation within the woodland limits of the Queen's Park. The Architect was Frederick William Cumberland, Esq., now Managing Director of the Northern Railway, and Lieutenant-Colonel Commanding the 10th Royal Volunteer Battalion of Infantry. Colonel Cumberland was also Architect of the Normal and Model Schools, of St. James' English Cathedral, and of Osgoode Hall, prominent structures in the city, besides various public buildings situated in different parts of the Province.

UNIVERSITY COLLEGE.

On the first establishment of the Provincial University, the functions of instruction, and of examining for honours and degrees, were continued under the Act of 1849. With a view of adapting the University to a system of affiliated Colleges, the functions were separated, and University College as a distinct Collegiate Institution.

GUIDE BOOK OF TORONTO,

MAGNETICAL OBSERVATORY.

In close proximity to the University buildings stands the **Magnetical Observatory**, founded by the Imperial Government in 1846. The present building, which was completed in 1855, is 54 by 44 feet, of one story, and having a tower at the north-west angle. It is divided into several departments for marking the transit, the declination, the horizontal magnetic intensity, and other astronomical and meteorological purposes; and is very complete in all its departments.

UPPER CANADA COLLEGE.

This Institution was established in the year 1829, by Sir John Colborne, then Lieutenant-Governor of Upper Canada. It was intended for general education, to prepare the way for, and ultimately assist in filling the Provincial University, then only projected. It was built from designs by Mr. J. Chewett, and opened for tuition on the 4th January, 1830. About 2,600 pupils have been entered on its books, a goodly proportion of whom have filled, or fill the most distinguished offices in the Province. Until the city acquired wider and grander proportions, this College, or Royal Grammar School, standing opposite the Government buildings on King Street, was long a chief ornament at the west end; the grounds in which it stands measure nine acres. The buildings consist of a series of brick structures; that in the centre is the College proper, with its boarding hall adjacent, and residences of the Masters on either side; the cost was \$80,000. This College is amply endowed. Its Officers consist of a Principal and twelve Masters. The average number of students is about one hundred and fifty.

UNIVERSITY OF TRINITY COLLEGE.

This Institution owes its existence chiefly to the persevering efforts of the late Right Reverend Dr. Strachan, Lord Bishop of Toronto, to repair what he, and Episcopalians in general believed to have been an act of grievous damage and deep offence to the English Episcopalian Church in Upper Canada, by the secularization of the endowments of King's College, and their transfer to the University of Toronto. Sufficient funds were provided by voluntary gifts of money and lands in the Province, to build and endow the new Institution. It stands at a short distance apart from the west end of King Street. The engraving presents a view of the front of the structure and of the grounds.

KNOX COLLEGE.

This institution was founded in 1844, by the "Free Church of Scotland," owing to the disruption which occurred in the previous year in the Scottish Established Church. The union which has been recently effected between the United Presbyterians and the Free—the two going under the name of "Canada Presbyterian Church"—has resulted in large benefits to Knox's College, and to the religious community so widely spread in Canada, whose Ministers are there educated.

ST. MICHAEL'S COLLEGE.

This College was opened in 1852, by the Fathers of the Order of St. Basil, under the auspices of the Roman Catholic Church, and was incorporated by Act of Parliament in 1854. The corporation consists of the Roman Catholic Bishop of Toronto and the Superior and Professors of the College, and may hold property to the value of £1,000 currency per annum.

TORONTO SCHOOL OF MEDICINE.

This School was established in 1843, incorporated in 1851, and in 1853 was affiliated to the University of Toronto.

THE MEDICAL BOARD.—Established 1819; examines candidates and issues licenses to the degree of Doctor of Medicine.

TORONTO.

Mr. TROTTER is mounting Teeth on a new base, which is stronger than Gold
or Rubber, and quite transparent. Call and Examine.

LAW SOCIETY.

The Law Society of Upper Canada was established by Act of Parliament in 1797, to enable the Practitioners of the Law to become a society "for the purpose of securing to this country, and the profession, a learned and honourable body, to assist their fellow-subjects as occasion may require, and to support and maintain the Constitution of the Province."

PROVINCIAL LAND SURVEYORS.

Quebec and Ontario have each a Board of Examiners, composed of the Commissioner of Crown Lands and eight other persons appointed by the Governor. The Board for Ontario meets at Toronto, and the other at Quebec, on the first Monday of January, April, July and October of each year.

MECHANICS' INSTITUTE.

This Society was established in 1830, and incorporated in 1847, "for the purpose of forming a Library and Reading Room, and of organizing a system of instruction by means of lectures and classes." The lectures have been attractive and instructive. Its reading-room is well supplied with Canadian, English and American periodicals. The library is well filled and well arranged.

THE CANADIAN INSTITUTE.

This originated among members of the Engineering and Surveying professions, in 1849 as a strictly professional society. In 1851 it became more general in character; and on the 4th of November of that year a Royal Charter was obtained, defining the objects of the Institute to be—the promotion of the Physical Sciences; the encouragement and advancement of the Industrial Arts and Manufactures; the formation of a Provincial Museum, and the acquisition and dissemination of knowledge connected with the Surveying, Engineering, and Architectural professions. In 1855 it was amalgamated with the Toronto Athenæum.

Other literary and educational institutes are the "University Association," "University College Literary and Scientific Society," "Trinity College Literary Institute," "Knox College Missionary Society," "Medico-Chirurgical and Ethical Society," "Toronto Literary Association," "Osgood Club." This association was instituted in the Fall of 1848, for the promotion of the study of law. It is limited to members of the Law Society of Upper Canada, and its debates and essays are on questions connected with the laws of England and of Canada. There is also the "Toronto Horticultural Society," its charming gardens and club meetings, to advance the science and practice of floriculture, and a love of the loveliest natural products. Likewise with kindred objects, "The Central Agricultural and Horticultural Club," in connection with the "Board of Agriculture." The utility of this association is without a limit. The grand annual Provincial Fairs and Industrial Exhibitions are its outward demonstrations, but its less prominent influences ramify every day of the year through all the arteries of industry.

THE YOUNG MEN'S ST. PATRICK'S ASSOCIATION

was established in 1855, for the following objects:—"To present to the young Irishmen of Toronto opportunities and incentives to intellectual improvement, to multiply their sources of information, to establish a library, reading room and debating club, to provide for the delivery of public and private lectures, to procure pecuniary means for benevolent and intellectual purposes, to promote a friendly intercourse between them and, finally to create, excite, and maintain a warm love for their native land, and a worthy zeal for the honour and character of their race."

THE LUNATIC ASYLUM.

This institution is supported by grants, and by a tax of one penny in the pound of the rateable property in each municipality. It was opened for the treatment of patients in 1841, but the then accommodations having been found utterly insufficient, the present building was commenced in 1845. It meets the requirements of some four hundred patients, yet requires constant additions, and a branch has also been established in the old University buildings. It is under the able superintendence of Dr. Workman. The grounds are always open to public inspection; and with their formal walks and masses of flowers and shrubbery, will well repay a visit.

THE EXHIBITION BUILDING,

Also called the Crystal Palace, is situated on the extreme limits of King Street West, in the rear of the Asylum, and is accessible by the same route. Its dimensions are 256 feet in length by about 130 in width, the space enclosed being thus considerably more than half an acre. The frame work of the structure is of cast iron, the roof being tinned and the sides glazed. It was erected by the Board of Agriculture.

OSGOODE HALL.

This is one of the finest buildings in the city. It consists of a main building with a projecting wing at either end, ornamented with Grecian porches and is surrounded by a spacious lawn. It is the building in which the higher courts of law assemble, and in which the lectures and examinations take place. It is situated on Queen Street, near the entrance to the South College Avenue.

ROYAL LYCEUM,

A structure devoted to the interests of the drama, and situated on King Street West, midway between Bay and York Streets. Its management is judicious and enterprising. The building is not large; but the citizens of Toronto, being, like Brutus, "not game-some," it answers all requirements.

ST. JAMES' CATHEDRAL.

This massive English Gothic structure, the largest of all the Protestant houses of worship in the city, stands at the corner of Church and King Streets. Its extreme length is 200 feet, and width 115 feet. The interior is 111 by 75 feet. A highly ornamental double doorway, with pointed arches, forms the entrance. The roof is of open timber work of elegant design, rising 70 feet from the floor. The chancel is semi-octagon in form, of the depth of 42 feet; pierced with pointed windows of rich tracery, and ornamented with carved panels, the altar piece forming the centre. In the aisles are triple lancet windows. The pews are of Gothic character, handsomely carved. The edifice is fitted to seat 2,000 persons.

ST. MICHAEL'S CATHEDRAL

Fronts on Bond Street, extending along Shuter to Church Street. In architecture, it is of the English decorated Gothic style; the material being white brick, trimmed with cut-stone. It is 200 feet in extreme length, by 115 in width, including the transepts. The eastern window is highly ornamental, being 36 feet high and 18 wide. The nave within is 170 feet by 40, in area, and 66 in height, with rich ceiling, piers and arches.

ST. LAWRENCE HALL.

Of this building, located on King street, east of St. James' Cathedral, the lower story is occupied as the general market of the City; and the upper contains a large hall, which is used for concerts and public meetings. The main building is 140 feet on King

street, by 75 on the side streets ; the front consisting of a portico of 12 pilasters, supporting a pediment, in the centre of which the city arms are cut in stone. The whole is capped by a cupola, containing bell and clock. On this bell the fire alarm is sounded, by striking the number of times indicating the number of the ward. The extension in the rear is 200 feet in length, giving to the area, which traverses both this portion and the main building, a total length of 275 feet. The hall in the upper story is 100 by 38 feet. The arcade is filled with stalls, and the bread squares outside are daily filled to repletion with the vehicles of farmers, laden with the produce of the surrounding country.

CITY HALL.

Our City Hall, built of mixed stone and brick, is opposite the lower end of the market, and is the headquarters of the corporation. It contains the office of the Mayor, S. P. Harman, Esq., the Council Hall, and the city government offices ; and, on the ground floor, the lower market.

THE MASONIC HALL

On Toronto street, next the Post Office, was completed in 1858, faced with Ohio freestone. Its dimensions are 102 by 75 feet, and the Central portion is 6 stories high. Its street floor is devoted to stores ; and the upper portion contains the lodge and business-rooms of the Masons, and other apartments devoted to mercantile purposes.

THE EXCHANGE.

Situated on Wellington-st., corner of 'Change Alley, was erected in 1855. It contains the Merchants' Exchange, the rooms of the Board of Trade, Montreal Telegraph Office, and business apartments. The front is embellished with a Grecian-Doric portico.

THE GENERAL HOSPITAL

Was incorporated in 1847, under the superintendence of five trustees, and furnishes gratuitous relief to a large number of persons. The site, on the corner of Don and Sumach Streets, occupies five acres. The building is of three stories in height ; the basement containing the domestic offices ; the ground floor suites of examining and consulting rooms, wards for surgical cases, bath-rooms, &c., and the upper stories the wards for patients requiring medical treatment. The building is also provided with a museum, theatre, water reservoirs, &c. It is under the direction of five trustees : three being appointed by the Government, one by the Corporation, and one by the Board of Trade. The immediate management is entrusted to a corps of able and skilful physicians and surgeons. From the central tower a fine view of the surrounding country may be obtained, its elevation being nearly 200 feet above the level of the lake.

THE COUNTY COURT HOUSE,

A plain building of three stories, and 152 feet frontage, in which the Courts of the United Counties of York and Peel are held. It is situated on Adelaide Street East, near Toronto Street, and contains apartments for the use of the Division, Recorder's and County Courts ; and the Courts of the Queen's Bench ; Office of County Treasurer ; Clerks and Sheriff's Offices, &c.

BANK BUILDINGS.

The banking houses of the Ontario Bank and Bank of Toronto are two of the finest buildings in the city. They are both located on Wellington Street, the former at the corner of Scott, and the latter at the corner of Church Streets. Both are of stone, with elegant porticoes, finely chiselled. The other banking houses are located as follows :—

of 12 pilasters, supported by stone. The whole is bell the fire alarm is of the ward. The arch traverses both this all in the upper story squares outside are with the produce of the

OLD AND NEW JAILS.

The new jail is situated on the banks of the river Don, at the extreme eastern limits of the city, and is a prominent object from the bridge which spans that stream. The old jail will be found on the corner of Parliament and Palace streets.

GOODERHAM & WORTS' DISTILLERY.

In the immediate vicinity is the extensive distillery establishment of Messrs. Gooderham & Worts.

GAS WORKS,

The City Gas Works are also in this neighborhood; the various buildings of which cover an area of 3 acres, and consist of a large retort house, meter house, coal sheds, with a storage capacity of 8,000 tons, gasholders, &c. Here, too, will be found the Rolling Mills of the Grand Trunk Railway.

HOUSE OF PROVIDENCE.

Built by the Roman Catholics for charitable relief to orphans, and to the aged and infirm. It is an extensive building of brick, with towers, and sharp and pointed roofs, the latter, for architectural effect, brought into great prominence, and diversified by dormer windows, and clusters of chimney stacks. It will be found on Power street, between King and Queen. The interior arrangements are very complete, consisting of sick-wards for the patients, dispensary, chapel, bath-rooms, and other accommodations.

GREAT WESTERN R. R. STATION.

The station of this railway, on Front street, at the foot of Yonge, is an extensive wooden building, and is used both as a passenger and freight depot. The Custom House is also in this vicinity. Above this, on Yonge street, will be found the building of the American Express Co.

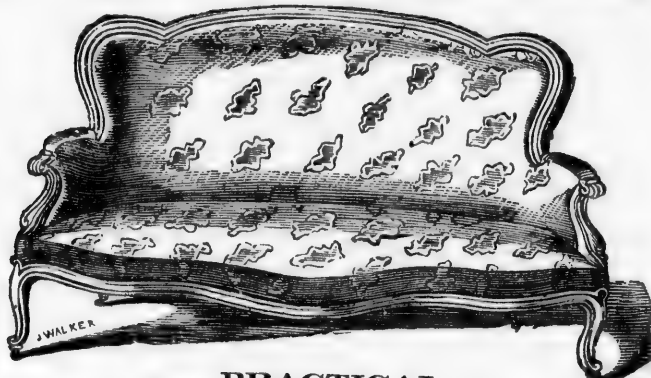

PUBLIC PARKS.

The principal public park in the city, entitled the "Queen's," is located a short walk west of Yonge street, and north of Queen. It is approachable from the former street by what is called the North College Avenue; and from the latter by the South College Avenue; both of these being protected by triple rows of fine shade trees, and forming a beautiful drive. The park itself contains upwards of 100 acres, and within it are situated the University Buildings and the Observatory. It is amply provided with shade trees, walks, and play grounds. It is a general resort, in the summer season, for picnics, concerts and promenades. On Queen street east will be found a Park, of smaller dimensions, called Moss Park, finely shaded; and a little north of it, on Gerrard-street, the Horticultural Gardens, a favorite resort. Some of the finest residences in the city are in this vicinity.

ST. JAMES' CEMETERY.

This burial place embraces about 70 acres of land, at the extreme northern limits of the city, bound on the west by Parliament-st., beautifully laid out with walks and shrubbery. A chapel and gate-keeper's lodge are near the entrance; and here will be found

many sculptured memorials of the departed. It is open for inspection throughout the day. Near by, to the eastward, on the banks of the Don, is the "Necropolis," a smaller cemetery, also finely planned and shaded, and to which an extensive addition is now being made.

THE STREETS.

The leading thoroughfares of Toronto are Yonge and King streets. The former commences at the bay, its southern extremity, running north to Yorkville; and forms the separating line, by which the cross streets are divided into east and west. King st. crosses Yonge at right angles, running from the eastern limit of the city, at the Don river, to its western limit, at the Crystal Palace or Exhibition Building. The following table will show the streets crossed in traversing these thoroughfares:

THE ISLAND.

This is the sand-bar, which the tides have raised, and which forms the harbor of Toronto. The Light-house, which directs the mariner to the entrance of the bay, stands hereupon. There is also a grove here, and several houses of refreshment. Two small steamers, the "Bouquet," and "Princess of Wales," ply constantly from the Yonge-st. wharf, across the intervening waters; its accessibility and exposure to the sea breezes combine to render it a popular place of recreation in fine weather.

NIAGARA FALLS.

This sublime spectacle, the most magnificent of all the works of nature on this continent, is of easy access from Toronto, by means of the Great Western Railroad, and also

CALL AND SEE SPECIMENS.

by the fine steamer "City of Toronto," one of the fastest boats on the lakes. The steamer will make excursion trips during the week, which will enable parties to visit the Falls and return the same day.

HORSE RAILROADS.

There are two lines of Horse Railways in the city, for the accommodation of the public. Both of these start from the St. Lawrence Market, King.st. East, and traverse the same rails through King and Yonge-streets, to the junction of Yonge and Queen, after which they separate, the Yonge-street line continuing on that road to Yorkville, while the Queen-street line branches off at the above junction, passing through Queen-street to the Asylum, at the western limits of the city. Each of these lines will start a car every few moments during the week of the Fair.

THE PROVINCIAL EXHIBITION.

The Provincial Exhibition Buildings have undergone large repairs, of which the following are the main particulars:—

A new poultry shed, 176 feet by 26 feet, containing 380 coops, has been built on the west end of the grounds.

A new stable, 162x30, designed to accommodate 54 horses, has been erected on the north side of the grounds; and three other buildings, which have been altered, will furnish accommodation for 120 more horses.

On the north side of the ground, just east of the stables, four new buildings have been built for sheep. Two of them are 240 feet long each; the third is 150 feet long; and the length of the fourth is 130 feet. These, with two old buildings that have been altered, contain 290 pens.

On the south side of the road the whole of the old hog-pens have been reconstructed. A new building, 180 feet long, containing 60 pens, one 90 feet long containing 30 pens, and one 192 feet long containing 64 pens, have been built. Altogether there will be 216 hog-pens.

The three buildings which, during the occupation of the Crystal Palace by the 13th Hussars, were used as horse-stables, have been converted into cattle-sheds; and two new cattle-sheds have been erected. One of these buildings is 162 feet long, and the other 210 feet long. Altogether they contain 192 pens, 30 of which have been specially constructed for bulls.

Two forage barns, 36x24 feet each, have been built, one on the north side of the road, in front of the horse-stables, and the other on the south side, in the vicinity of the cattle-sheds.

A new shed for implements has been built on the south side of the road, just west of the cattle-sheds. Its dimensions are 200x25.

For a horse ring, a portion of the ground has been fenced off in the shape of an oblong, 400 feet long and 250 wide, with rounded corners. Six cattle rings have also been staked off.

In the Crystal Palace a new gallery rail has been put up; the floors and large gates at the four entrances have been repaired, and the tin work on the roof has been completed. The latter has received a coat of Canadian cement roofing. The fountain has been

reconstructed in the centre of the hall, and pipes for supplying it with water are connected with the cupola of the Lunatic Asylum. The picture gallery and this portion of the building have been colored.

The hall for fruit and flowers has received a coat of whitewash. That portion of the building which it is designed to use for the exhibition of roots, &c.—the old riding school—has been put in proper condition. The inside of the Crystal Palace is not to be painted.

North of the Crystal Palace a ladies' saloon and reception room has been erected.

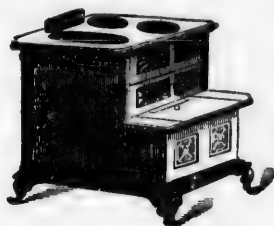

The fences around and the entrance gates have been thoroughly repaired; a new roof has been put on the building in which the offices are situated, and that and the out buildings are being painted and plastered.

Altogether, the preparations for the Exhibition of 1870 are now as complete as could well be desired.

RULES AND REGULATIONS.

1. The Members of the Agricultural Societies of the several Townships within the County or Electoral Division, or United Counties, wherein the Annual Exhibition may be held, and the members of the County or Electoral Division Society, shall be also members of the Association for that year, provided the Agricultural Societies of the said Townships, or Society of the said County, or Electoral Division, or United Counties, shall devote their whole funds for the year, including the Government Grant, in aid of the Association, and shall pay over the same, accompanied with a list of the members of such Society, to the Treasurer of the Association, two weeks previous to the Exhibition; and provided also that the sum so paid over shall not be less than one dollar for each member of any such Society.
2. The members of the Council and the ex-Presidents of the Association, the Presidents and Vice-Presidents of all lawfully organized County Agricultural Societies, of all Horticultural Societies, and of the Mechanics' Institutes, are members of the Association for Ontario *ex officio*. The payment of one dollar and upwards constitutes a person a member of the Association for one year, and of ten dollars for life, when given for that specific object, and not as a contribution to the local funds.
3. No person shall be allowed to enter for exhibition more than one specimen in any one section of a class, unless the additional article be of a distinct named variety or pattern from the first. This rule not to apply to animals, but to apply to all kinds of grain, vegetable products, fruit, manufactured articles, &c., in which each additional specimen would necessarily be precisely similar to the first. No exhibitor in the Arts and Manufactures Department shall be awarded more than one prize in any one section of the same class.
4. *Extra Entries.*—Every article must be entered under some one of the headings in the regular list, when possible; but if any article is of a distinct character from anything specified in the list, it may then be entered in the extra section of that class with which it most nearly corresponds. No article, however, will be allowed to be entered as an extra for want of sufficient quantity or number, or any other similar defect, when of the same kind or variety as anything named in the list; in such a case the article can not be exhibited.
5. Exhibitors will, at all times, give the necessary personal attention to whatever they may have on exhibition, and at the close of the Show take entire charge of the same.
6. Articles not accompanied by their owners may be addressed to the care of the Superintendent of the Exhibition, who will receive them on their being delivered at the Grounds; but in no case will such articles be brought on the Grounds and placed on exhibition, except by and at the expense of the owners or their authorized agents.

MANUFACTORY:

 **ESPLANADE, OPPOSITE NORTHERN RAILWAY STATION.**

7. Each award must be written in a plain, careful manner, on the blank page opposite the number of the entry.

8. No person will be allowed to interfere with the judges while in the discharge of their duties. *Exhibitors so interfering will forfeit their rights to any premium to which they might otherwise be entitled.*

EXTRACT FROM BY-LAW.

9. "The judges shall, in the execution of their duties, be careful to act with the most rigid impartiality; shall make their entries in a clear and conspicuous manner, in all cases of doubt or difficulty referring freely to the Secretary, or to the Committee of the Council in charge of the department, and when they have completed their reports, shall sign and deliver their books to the Secretary of the department to which they belong.

ADMISSION TO THE GROUNDS.

10. Each member, on paying his subscription will be furnished with four small admission tickets, each of which will admit the holder once, and must be given up at the gate on passing into the Grounds. By economy in the use of these tickets, they can be made to last during the Show; but if a member shall have used them all, and still desires admission, he will have to pay for admission in the same manner as a non-member. Life-members will be furnished as heretofore, with tickets or badges admitting them during the Show. Delegates from Societies, and members of the Press, will also be furnished with complimentary admission badges or tickets, as heretofore.

11. The entry tickets upon animals or articles will admit the person bringing them to the Show Grounds for exhibition, along with such animals or articles, without the use of any other ticket. Afterwards such parties must be provided with proper admission tickets.

12. Necessary attendants upon stock and articles belonging to exhibitors will be furnished with admission tickets with their names written upon them, which tickets will be good at the *Exhibitors' Gate only*, during the Show.

13. The price of admission to those who are not members will be 25 cents each time of entering through the gates on Monday, Tuesday, Wednesday, Thursday, and Friday. The mode of admission will be made known previous to the Exhibition. Carriages and horsemen will not be admitted. All horses entered for exhibition purposes shall only be ridden or driven while being exhibited, and in the ring.

JUDGES AND THEIR DUTIES.

14. No person shall act as a judge in any class in which he shall be an exhibitor.

15. In addition to the stated premiums offered for articles enumerated in the list, the judges will have the power to award discretionary premiums for such articles, not enumerated, as they may consider worthy, and the Directors will determine the amount of premium. The judges may also distinguish such animals or articles as they consider deserving of notice, but which have not received prizes, by tickets with the words "Highly Commended," or "Commended," upon them. These tickets will not entitle the holder to any money payment.

16. In the Fine Arts and Mechanical Departments, Diplomas will be awarded, in addition to the money prizes, to any specimen evincing great skill in its production, or deemed otherwise worthy of such a distinction, on its being recommended to the judges and approved of by the Committee, to whom all such matters shall be referred.

17. *In the absence of competition in any section, not more than one prize shall be awarded. If the stock or articles exhibited be of inferior quality, the judges are instructed to award only such premiums as they think the article deserving of. They will exercise their discretion as to whether they will award the first, second, third, or any premium.*

DICKEY, NEILL & CO.,

SAW MILLS, &c. ;

**Canting Machines, Double Edgers, Butting Saws, Swing
Saws, Stave Cutters, Gumming Machines, &c.**

SWARTWOUT'S OSCILLATING GANG.

We would respectfully call the attention of all engaged in the Manufacture of Lumber to this valuable improvement in Vertical Saw Hangings. By its peculiar construction the Saw, on its downward motion, strikes at the bottom of the log first and continues an even pressing cut until the pitman reaches the forward centre, when the lower end recedes and the top is carried forward by inclined Slides, thus producing an even Rotary Cut. This Gang will carry more fuel with less power than any mill working upon straight lines, and will increase the capacity at least 25 per cent.

A. D. Cole's Samson Turbine Water Wheel.

The Best Wheel manufactured on the continent ; will do more work, give more power and better satisfaction, with less water and expense, than any other Wheel.

Agents in Canada for the **EARLE STEAM PUMP.**

DICKEY, NEILL & CO., Toronto.

18. Under "Extras" in each of the classes, when more than one entry of the same kind of article has been made, they will be judged as in competition for first and second prizes, the same as though they had been in regular sections, and when but one such entry has been made, the article, if worthy, shall be awarded a first or second prize. The judges, however, are instructed not to award prizes in either the "regular" or "extra" sections of any class, unless the articles come up to the desirable "standard of excellence."

19. In the classes of Horses and Cattle, all male animals above one year old, must have served in the Province one year previous to the Exhibition, or serve one year thereafter.

20. In all the other classes, entries must be made in the names of the producers or manufacturers only, and by such producers themselves in person, or their agents duly authorized. If any person shall enter an article for exhibition, as produced or manufactured by himself, when it has not really been so, he shall forfeit any premium which may be awarded the article, and be precluded from exhibiting in future.

21. In all the departments the competition is open to exhibitors from any part of the world, without reservation, on compliance with the rules.

22. Manufacturers are requested to furnish with the articles exhibited, a statement of the quantity they can produce, or supply, and the price, for the information of the judges, whose decision will be based on the combination of quality, style, and price, and the adaptation of the article to the purpose or purposes for which it is intended.

23. All Agricultural and Horticultural products must be the growth of the present year. Manufactured articles or works of Art which have been awarded prizes at any previous Provincial Exhibition shall not be entered in competition for the prizes named in the prize list for this year, but shall be awarded diplomas, if, in the opinion of the judges such articles are superior to any others exhibited, and are deemed worthy of the same.

24. On the entry of each animal or article, a card will be furnished the exhibitor specifying the class, the section, the number of the entry, and the name of the exhibitor, which card must remain attached to such animal or article during the Exhibition.

TRANSPORT OF ARTICLES, PLACING THEM ON EXHIBITION, AND CHARGE
OF THEM WHILE THERE.

25. All specimens in the Fine Arts Class must be delivered on the grounds *not later than Friday*, the 30th of September, and all articles other than live stock, not later than Monday, the 3rd October. Live stock must all be on the ground not later than Tuesday, 4th, at noon. Articles or animals arriving after these hours will not be allowed to compete. Exhibitors of machinery and other heavy articles are requested to have them on the grounds, as far as possible, during the week preceding the Show.

26. Exhibitors must provide for the delivery of their articles upon the Show Ground. The Association cannot, in any case, make provision for their transportation, or be subjected to any expense therefor, either in their delivery at, or return from the grounds. All the expenses connected therewith must be provided for by the exhibitors themselves.

27. Exhibitors on arriving with their articles, will apply to the Superintendent of the Grounds, who will be stationed within the entry gate, and will inform them where the articles are to be placed.

28. No articles or stock exhibited will be allowed to be removed from the grounds till the close of the Exhibition, on Friday afternoon, at two o'clock.

29. While the Directors will take every possible precaution, under the circumstances, to ensure the safety of articles sent to the Exhibition, yet they wish it to be distinctly understood that the owners themselves must take the risk of exhibiting them; and that

The above Machines are superior to any now before the public. They are celebrated for manufacturing the Best and Cheapest article, and no danger need be apprehended from their use, in confirmation of which we refer to the following, who are using them:—John Shannon, Toronto; W. Bilton, Hamilton; Edward Bilton, London; W. A. King, Peterboro'; J. McCulloch, Guelph; and a number of others throughout the Province.

should any article be accidentally injured, lost, or stolen, the Directors will give all the assistance in their power towards the recovery of the same, but will not make any payment for the value thereof.

STEAMBOATS, RAILROADS, CUSTOMS.

30. The Association will make such favorable arrangements as are found practicable with Steamboat and Railroad proprietors for carrying articles and passengers at reduced rates.

31. Arrangements will be made with the Customs Department for the free entry of articles for competition.

32. Numbers of carriage, buggy, and saddle horses having heretofore been entered merely for the purpose of obtaining cheap stabling and driving about the grounds, the Committee on Horses will have the power to exclude from the grounds any such animals as appear unworthy of entering for competition.

THE GENERAL SUPERINTENDENT.

33. The General Superintendent will have the entire supervision of the Grounds and the arrangements of the Exhibition. He will have an office upon the ground, where all persons having inquiries to make in relation to the arrangements will apply.

PAYING THE PREMIUMS.

34. The Treasurer will be prepared to commence paying the premiums on Saturday, October 8th, at 9 A.M., and parties who shall have prizes awarded them are particularly requested to apply for them before leaving Toronto, or leave a written order with some person to receive them, stating the articles for which prizes are claimed.

35. Persons entitled to cash premiums must apply for them at the Secretary's Office, who will give *Orders on the Treasurer* for the amount.

36. These orders must be endorsed, as they will be payable to *order*, not to *bearer*, and on presentation to the Treasurer, properly endorsed, will be paid either in cash or by cheque on the bank.

37. Orders for premiums not applied for on Saturday, as above, will be given by the Secretary, and the amount forwarded by the Treasurer, on receipt of proper instructions.

EXTRACT FROM AGRICULTURAL STATUTE.

"All persons to whom a prize is awarded shall apply to the Secretary of the Association for payment thereof before or on the 30th day of November of the year in which such prize is awarded, or shall forfeit such prize."

MISCELLANEOUS.

38. Provender will be provided by the Association for live stock at cost price. For information, exhibitors will apply to the Superintendent of the grain and fodder department at his office.

39. In case the Directors shall require any particular information in reference to animals or articles taking first prizes, the owners will be expected to transmit it when requested to do so.

VIRGINIA TOBACCO WORKS.—Mr. W. D. Kennedy, (formerly of Hamilton) the proprietor of these new and extensive Works, conducted us over his establishment a few days ago. The premises are situated on York St., (next to Nelson Wood & Co.'s) nearly opposite the Rossin House, taking up two large stores, portions of the party walls of which have been removed so as to make a sufficiently extensive Warehouse. The machinery, which is now complete, is of a very superior class, and was made by Messrs. C. C. Winchell & Co., of Cincinnati, specially for the Works, which Mr. Kennedy seems determined shall be equal if not ahead of anything in the Dominion, in regard to equipment. Every grade of Tobacco will be manufactured, and in bright goods Mr. K. purposes to endeavour to supply the demand which now exists, owing to the Virginia market being shut to our merchants. He has the advantage of the experience and assistance of the oldest Cincinnati manufacturer; and with the facility which he possesses, gives us every reason to expect that Toronto has gained a very important addition to her manufacturing interests, in the establishing of the *Virginia Tobacco Works*.

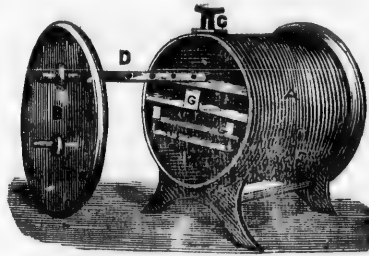

NEW FIRM.—We note another addition to our list of merchants—Messrs. E. H. Moore & Co.—General Commission Merchants, &c., who have recently commenced business here. This firm are agents for the well known Safe manufacturer, of Montreal—Chas. D. Edwards (formerly Kershaw & Edwards). Arrangements have been made so that Messrs. Moore & Co. will be in a position to compete in prices with any in the market; and he has already brought on a fine supply of the various sizes made. We believe that in this line they are exhibitors at the Exhibition. Messrs. M. & Co. will also be engaged in various branches of the Commission Trade.

FANCY GOODS, WOODEN WARE, WILLOW WARE, ETC.—We direct attention to the advertisement of Messrs. Nelson, Wood & Co. They are extensive importers and wholesale dealers in European and American fancy goods, fireworks, toys, paper hangings, clocks, looking-glasses, and looking-glass plates, cordage, mats and baskets; and manufacturers of brooms, wooden ware and matches. From their superior facilities for manufacturing and importing, and their long experience in the fancy goods and wooden ware trade, they are enabled to sell at the lowest market prices, while they are now offering special inducements to jobbers and large buyers. They have also on hand a large stock of staple and fancy goods, adapted to city and country trade. From the high reputation of this firm for fair and honorable dealing, we are satisfied that parties sending orders will have them filled to their utmost satisfaction. The Toronto establishment is at 74 and 76 York street, and their Montreal house at 25, 27 and 29 St. Peter street. Country merchants coming to the city this fall, as well as visitors to the Exhibition, will find it to their advantage to give Messrs. Nelson, Wood & Co. a call.

IRWIN'S

PATENTED,

FEB. 24, 1869.

A, body of Heater, which may be made of any form to suit circumstances. B., head of Heater drawn out to show feed pipe, etc. This is bolted to body, and can be easily removed or affixed. C., escape pipe for waste steam. D., cold water feed pipe. E., overflow pipe. F., exhaust pipe. G. G., perforated shelves. H., filter. I., receiver.

Patent Waste Steam Heater AND CONDENSER.

The attention of persons using Steam Power is invited to "IRWIN'S PATENT WASTE STEAM HEATER AND CONDENSER." It effects a saving of 30 per cent. in the fuel, and adds to the motive power. It prevents INCORUSTATION or CORROSION in the Boiler.

No Manufacturer should be without it. They are now in operation in some of the leading Manufactories of the Province.

Parties ordering Heaters are requested to send No. of Horse-power of Boiler.

For further particulars apply to

J. IRWIN, Box 229, Oshawa, Ont.

N.B.—All persons are cautioned against any infringement of this Patent.

TESTIMONIALS.

Mr. J. IRWIN, Oshawa.

DEAR SIR,—In reply to yours of this date, I beg to say that we have had your Heater in use about ten months, and consider it a success, and great economiser of fuel, saving us, as it does, about thirty per cent. Our Engineer informs me that the last time he cleaned it out, he took about two bushel of lime and sand out of it. It heats the water within about (12) twelve degrees of boiling point. I can cordially recommend it to all persons using steam power.

W. H. GIBBS.

WOODSTOCK, August 12, 1870.

JOHN IRWIN, Esq., Oshawa.

DEAR SIR,—In reply to yours about your Heater, I must say, that, as far as saving of Fuel is concerned, your Heater does all in that respect that you claim for it. As I never had any trouble with Lime in my Boiler, and cannot speak on that point, but have been troubled with Sand, and find that it keeps the sand from getting into the Boiler. I have two run of oatmeal stones and two run of flour stones, with one and one-fourth cords of pine wood per day, but before your Heater was put in I used about one and three-quarter cords of hardwood per day. It thus effects a saving to me of fully one half for fuel.

I remain, yours truly,

JOHN FOREST.

Mr. IRWIN,—DEAR SIR,

Having used your Patent Heater for some months, I can fully recommend it as a great fuel economiser, as it is capable of condensing the steam from our forty horse-power engine, and also cleanses the water. It does more than the inventor claims for it. I would not be without it for any consideration.

M. DEAN, OSHAWA.

WOODSTOCK, August 12, 1870.

Mr. IRWIN, OSHAWA.

This is to certify that I have in, and have used for the last five months one of Irwin's Patent Heaters, and I believe it to be superior to any other Heater in use, as it proves a great saving in fuel.

TORONTO BUSINESS CONCERNS

SOHO FOUNDRY,

QUEEN, BEVERLEY & SOHO STREETS, TORONTO.

DICKY, NEILL & Co., Proprietors.

It is always a pleasing duty to record the success and advancement of our Home manufactures and more especially so when, as in the case of the Soho Foundry, we find that the establishment is, as it were, wholly our own. having sprung up in our midst and risen from its unpretending primitive state to its present enormous dimensions by a steady growth and active enterprise of the proprietors. In our editions of former years we have usually noticed the progress of the Soho Foundry, and we are happy to say that we have this year to notice a much more extensive and decided improvement than in any year since its commencement.

For the benefit of any who may not have the opportunity of visiting it we may give a very short sketch of the establishment, but to any who can, we have no doubt that it will amply repay the trouble. Crossing the weigh house and weigh bridge from the office (where of course visitors are expected to get permission to go through the works) we enter the Machine Shop, a building about 300 feet long by 55 feet wide, well stocked with all the most approved tools for Iron work, such as Lathes, Drilling Machines, Planing Machines, Shaping Machines, Slotting Machines, Screwing Machines, Bolt Cutters, &c., and in a building specially set apart for the work are Axle Lathes, Car Wheel Boring Machines and Hydraulic Presses for pressing car wheels on the axles. The action and power of some of these Machines to the uninitiated are truly astonishing, and perhaps the most noticeable are a very large Lathe, capable of running a wheel 18 to 20 feet in diameter of their own manufacture, and built expressly with the view of meeting the demands of the heavy work which forms so large a portion of the business of the establishment, and a very powerful Hydraulic Ram which exerts a power of from 200 to 250 tons. In this Machine Shop alone there are constantly employed over 100 Mechanics.

The "Moulding Shop" or Foundry proper, situated in the rear of the Machine Shop, though formerly one of the largest in the Dominion, has this year been extended to nearly double its former size and capacity. It is fitted up with two large melting furnaces and two heavy cranes now in operation, and another furnace and crane in course of construction. In this department all kinds of castings are made, varying in weights up to 5 or 6 tons each, and the same forethought in providing every facility for the handling of large or heavy work which is so striking throughout the whole establishment is noticed here. At present the amount of iron melted is from 5 to 7 tons per day, but with the aid of another now erecting this will of course be largely increased.

In the Smith Shop there are 18 forge fires and a furnace, the blast for all of which is furnished by a fan run by steam power. There is also a steam hammer manufactured by themselves, and many other appliances for the working of wrought iron. The annual consumption of raw iron here is about 900 tons and of coal about 700 tons.

The Boiler Shop is a large new building erected this summer to the rear of the Foundry and fronting on Soho street. It is supplied with machinery of the heaviest description designed and manufactured by the proprietors, and particularly suited to the requirements of their extensive business in this line. The Pattern Shop and Car Shop are to the north and also fronting on Soho and Phoebe streets, but we have not space to say more of them than that the one is replete with the choicest models and patterns of the best machinery

BAY STREET, TORONTO.

of the day, and in the Car Shops the manufacture of Railroad Cars is vigorously pursued, Messrs. Dickey, Neill & Co., being at present under contract with the Toronto, Grey and Bruce Railway Co., for a large amount of Rolling Stock for the equipment of their newly opened road.

The principal Manufactures of the Soho Foundry are Steam Engines and Boilers of all kinds, Portable, Stationary and Marine, for which they have gained an enviable notoriety. Water-Wheels, Gang and Circular Saw Mills, and Saw Mill Machinery, Grist Mill Machinery and Gearing, and in fine all sorts of Mill Machinery and iron work. The total annual consumption of Coal is about 1800 tons and of iron over 2700 tons, and the establishment employs over 250 hands.

We accord to this firm our hearty good wishes for their continued prosperity. Let "Excelsior" be their motto as heretofore, and they, relying on their innate energy, tact, and perseverance, will rear up in our midst such an establishment as shall reflect with even greater credit, and add additional lustre to our already auspicious manufacturing interests.

CARRIAGE HARDWARE.—William Brown, successor to A. Dixon & Son, 72 King street east, keeps always on hand a very extensive assortment of felloes, spokes, hubs, shafts, enamelled top and dash leather, enamelled cloth, springs, axles, curled hair and moss. Mr. Brown offers the best inducements to the trade. He is favorably known for his upright and satisfactory mode of doing business. Purchasers will find it to their interest to call before buying elsewhere.

UPHOLSTERING AND CABINET MAKING.—J. M. Wingfield commenced business as Practical Upholsterer, Cabinet Maker and Spring Manufacturer, at 151 Yonge street, a little over two years ago. He manufactures every description of Cabinet Ware, Chairs and Bedsteads; but his main business consists in getting up a superior class of furniture; and during the past season has filled orders for gentlemen in Toronto, and other sections of the Province, for drawing and bedroom sets, which compare favourably with the best produced by either American or European manufactories. His business has in this department been constantly increasing, so that he has been compelled to increase his facilities in order to supply the demand. He is a practical man, personally superintending the execution of all orders. He uses the best materials and for durability, taste, superior workmanship, and artistic finish combined, he challenges all competitors, either in the States or Canada.

STATIONERY, BLANK BOOKS, ETC.—See advertisement of Messrs. A. Dredge & Co., Wholesale Stationers, Blank Book and Envelope Manufacturers, 53 Yonge street, (south side of King,) Toronto. This is one of the oldest houses in the trade in Canada. They have at present on hand a very large stock of imported stationery, which they are offering at very close prices, and which is well worthy the inspection of buyers. They are also sole agents for Slater and Palmer's celebrated English Printing Inks, of which they have always a large stock on hand.

GEO. MICHAEL, OPTICIAN, 51½ King street east, has just received a splendid assortment of goods in his line, from the best European manufacturers. Parties requiring articles of this description should pay Mr. M. a visit.

THE WHEELER AND WILSON SEWING MACHINES.—We direct attention to the advertisement, on our fourth page, of G. A. Walton, general agent in Ontario for the Wheeler and Wilson Sewing Machines. His offices are at 85 King street west, Toronto, and 37 Sparks street, Ottawa. The Wheeler and Wilson Machine is so well and favorably known throughout the country, that it seems unnecessary for us to add to the general commendations in its favor. Improvement and progress are the spirit of the times, and this company is determined not to be left behind in the race.

CANADA STAINED GLASS WORKS.—This establishment, located at No. 8 King street west, was established in 1857 by Mr. Joseph McCausland for staining and enamelling in glass. Figures under canopies, memorial windows, coat of arms, &c., are here executed in the first style of the art; also plain and ornamental obscure glass for churches and public buildings; and embossed and enamelled work, with flowers, fruits, landscapes, &c. Stained and gilt cut glass letters are made to order, and glass bent to any required curve. The stained glass for Toronto University was supplied by Mr. McCausland, and several Churches and public buildings throughout Canada. The Departmental Buildings at Ottawa were entirely supplied from this establishment, which tells favorably for the superior character of the work turned out by Mr. McCausland, who is a practical, upright business man, and parties having transactions with him may rely on being dealt with in an honorable and straightforward manner.

THE LAMB KNITTING MACHINE.—This Machine is constructed on an entirely new principle, which, by its completeness and perfect simplicity, has produced a revolution in the art of knitting by machinery. It knits upwards of seventy articles of apparel—including Cardigan Jackets, and makes the polka stitch. It will complete a pair of stockings in thirty minutes. It also knits the most unique trimmings for all its own articles, such as the plain ruffle, double ruffle, collars, borders, &c. This Machine was awarded the highest prize at the Paris Exhibition of 1867; and gold and silver medals at Mechanical and Agricultural Exhibitions, including the Hamilton Exhibition of 1868. For circulars containing full particulars, address H. Bailey, General Agent, 28 King street west, who supplies the machines at manufacturers' prices.

WHOLESALE GROCERS.—We call attention to the advertisement of Thomas Griffith & Co., Wholesale Grocers, Wine and Spirit Merchants, and importers of English and General Groceries, 37 and 39 Front Street. Messrs. Griffith & Co. import largely from the best markets in the world; and their extensive trade sales the past summer have well sustained their reputation among the leading wholesale houses in Canada. Western buyers will find that they can do as well at this establishment as by going to Montreal, thereby saving the expense of time and travel.

ADAM, STEVENSON AND Co.—Among our most enterprising concerns, the above firm holds an honorable place. As publishers and wholesale and retail booksellers and stationers they are widely known throughout the Provinces. Their stock is large and important, and to the various departments are constantly being added the standard and recent works selected from the leading British and American houses. Messrs. A. and S. have recently commenced the publication of a valuable quarterly—the "Canada Bookseller," which reflects the highest credit on the public spirit, energy and business capacity of this enterprising firm; and we are convinced that all who examine the pages of THE CANADA BOOKSELLER will congratulate themselves that its conduct is placed in such able hands, and that it hails from a house of such high character. The editorials are well digested and practical; and, we hope, will claim that attention, both from the press and our legislators, which the important questions they treat of merit. The issue of such a serial as THE CANADA BOOKSELLER at this present juncture, and in the advocacy of such an important branch of industry, should be hailed with pleasure by all engaged in the book trade and its connections, no less than those interested in the intellectual progress of our people. The warehouse of Messrs. Adam, Stevenson and Co. is at 8, 10, and 12, King street, east.

STATIONERY AND BOOKBINDING.—We direct attention to the advertisement of the now widely known firm of Brown Bros. This firm commenced business in 1856, since which time their trade has steadily and constantly increased. They have lately largely extended their premises, which now extend in one sweep from King through to Court

DRAWINGS MADE FOR PATENTS OF INVENTIONS.

Street, giving them much greater facilities for carrying on their largely increasing business, and storing and displaying their large stock of goods. They have also greatly improved their manufactory, which now covers the same area as their warehouse; and having added to their already large stock of machinery and tools, every new improvement in machinery, their facilities are complete for turning out first-class work at low prices. They give employment to between 40 and 50 hands. They manufacture and keep on hand an extensive assortment of account books, which have justly gained a wide reputation throughout the whole Dominion. They obtained Honorable Mention at the Paris Exposition of 1867, for superiority and excellence in the manufacture of Account Books, and Bookbinding. The Pocket Book, Wallet and Diary branch of their business (a specialty in their line) is rapidly extending and becoming greatly appreciated. They deal largely in Paper and general Stationery, and having command of the best markets, and keeping one of the largest and most varied stocks in the city, the trade will find it to their advantage to deal with them. In book-binding they are unexcelled.

WHOLESALE JEWELLERY AND FANCY GOODS.—Messrs. S. Davison & Co., 32 Colborne Street, importers of and wholesale dealers in English, French and German Fancy Goods, Jewellery, Watch Materials, etc., keep a large and varied stock constantly on hand; and being men of business experience and enterprise, we have no doubt will give good satisfaction to their customers.

PICTURE AND LOOKING-GLASS FRAME MANUFACTORY.—Messrs. Phillips & Oliver have disposed of their retail establishment, "The Gallery of Fine Arts," and now devote their attention exclusively to the manufacture of Gilt and Rosewood Mouldings, and Gilt Oval Frames, for which they claim the best facilities in Canada, having introduced all the modern improvements. They are thus enabled to furnish their manufactures, equal in price and finish to the American, and at least 15 per cent cheaper. Purchasers will have an endless variety of patterns to choose from; and they have at present over 30,000 feet finished and in stock, which is far superior to any made in the Dominion. The manufacturers have had a very large experience both in England and the United States, and have taken first prizes for their goods at the Provincial Exhibitions. They are both honorable and straightforward business men, and we feel confident they will give the utmost satisfaction to all who may favor them with their orders.

MUSICAL INSTRUMENTS.—T. Claxton, No. 197 Yonge Street, a few doors north of Queen, keeps on hand a very fine assortment of Musical Albums, Violins, Concertinas, and all kinds of Musical Instruments. He also deals extensively in new and second-hand Pianos and Melodeons, and attends to tuning and repairing instruments with promptness and despatch.

ENGRAVERS ON WOOD, METAL, &c.—We are pleased to notice that the young and enterprising firm of Messrs. Chapin & Appleton have been earning a deservedly high reputation as wood and metal engravers, designers, etc., since their commencement in business. We have seen some very fine cuts of agricultural implements, machinery, buildings, &c., designed and executed at this establishment, which reflect the highest credit on the artistic abilities of Messrs. C. & A. They make a specialty of getting new and attractive designs for Illuminated Show Cards and Posters. Their office is a few doors East of the "Globe" office, King Street. While their work is good, their prices are very moderate—a desirable feature in wood engraving.

THE RUSSELL WATCH.—Mr. W. E. Cornell shows a splendid assortment of the celebrated Russell Watches during the Exhibition Week, which he is offering at very low prices. Jewelry, Fancy Goods, etc., can also be purchased at this establishment at very reasonable prices.

Mr. Smith is also Proprietor of the Barber's Shop at the Queen's Hotel.

PATENT AGENCY OFFICE.—Mr. A. Christie, Accountant, House, Commission and Patent Agent, 34 King Street East, Toronto, procures Patents for Inventions for the Dominion, United States, and Great Britain.

STEAM GAUGES.—We direct attention to the advertisement of James Morrison, Corner Bay and Temperance Streets, Practical Brass Founder and Finisher, manufacturer of Steam Gauges, Engineers' and Plumbers' and Gas-fitters' Brass Work. He is prepared to fill city or country orders promptly, wholesale and retail; and all work is done on the most approved principles, and on reasonable terms.

GILDERS AND ENAMELLERS ON CHINA.—The establishment of Messrs. Hurd, Leigh & Co. is located at 72 Yonge Street. Dinner Sets are gilded and crested to order; Breakfast sets in china and earthenware; Toilet and Tea sets are enamelled to any pattern. Inspection is invited. Messrs. Hurd, Leigh & Co. are deserving of commendation for establishing this new branch of manufacture in our midst.

THE WALTHAM WATCH.—Mr. Robt. Wilkes, 48 and 50 Yonge Street, is the Sole Agent in the Dominion for this celebrated time-keeper. He is an extensive importer and dealer in Watches, Clocks, Jewelry, Silver and Electro-plated Ware, general Foreign Fancy Goods, etc.

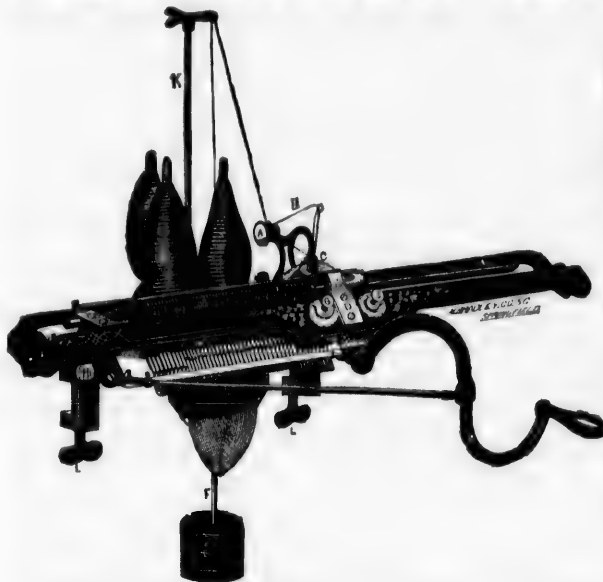

DAY'S COMMERCIAL COLLEGE.—At this institution, located on King Street East young men are instructed in the various systems of Book-keeping now in use in the most eminent mercantile houses in Great Britain, Canada, and the neighboring States, by a practical Accountant of twenty years' experience, acquired both in England and America. If you desire that your sons should occupy honored positions in life, then give them a sound practical education; and we know of no other institution where this object can be so rapidly, and at the same time so thoroughly, effected.

CARPETS, OIL CLOTHS, ETC.—Messrs. McDonnough & James' spacious Carpet, Oil Cloth, Curtain, Furniture and Upholstery Warehouse, is situated at No. 31 King Street East, Toronto. They are successors to James Baylis & Co., in Toronto. Their establishment will always be found filled with the newest and choicest productions of European, American and Canadian manufacturers, from whom they import direct. They would call special attention to the floor oil cloths of Messrs. J. Hare and Co., of Bristol, which stand unrivalled for durability, Messrs. H. and Co. having taken the Gold Medals at the London and Paris Exhibitions. They are also agents for the Oshawa Furniture Factory; and have always on view in their show rooms the most beautiful sets of drawing room, dining room and bedroom furniture manufactured. Parties from a distance visiting the Exhibition will find it to their interest to call at this establishment.

NEW HARDWARE HOUSE.—James M. Matthew, No. 81 King Street East, has a very superior stock of Furnishing and General Hardware, which will repay a visit. From Mr. M.'s experience in some of the leading houses of Scotland and England, as well as Canada, and by giving every attention to the requirements of his customers, which he is determined to do, we are satisfied he will give perfect satisfaction to all who favour him with their patronage.

ONTARIO PRINTERS' EMPORIUM.—This establishment, which attained so deservedly high a reputation under its founder, Mr. Halley, has passed into new hands—Mr. H. having disposed of his interest to his late manager and book-keeper—the Messrs. Gwatkin, who are determined to increase the great advantages the printers of the Dominion have enjoyed in their transactions at this establishment. The main distinctive feature of the new firm from the old one is, that instead of Scotch they will supply English and American type to their customers—they having been appointed sole agents for the Dominion for Stevenson and Blake, of London, England; the Messrs. Connor and Sons, of New York, and other eminent founders and printing press manufacturers.

LAMB KNITTING MACHINE.

It is patronized by the Royal Families of Europe, awarded a Gold Medal at Paris, 1867, and highest Prizes wherever exhibited, including the Hamilton Exhibition in 1868, for the

BEST, CHEAPEST

SIMPLEST, AND MOST COMPLETE KNITTER IN THE WORLD.

More than 13,000 Sold and in Use the last eight months.

LAMB'S FAMILY KNITTING MACHINE,

TUNING AND REPAIRS PROMPTLY ATTENDED TO.

New and Second-Hand Pianos and Melodeons constantly on hand.

197 YONGE STREET, A FEW DOORS NORTH OF QUEEN, TORONTO.

Their stock of book and news letter, wood type, presses and machinery, inks, papers, and requisites generally, will be as extensive, varied, and complete as that from which the printers of Canada have drawn their supplies heretofore. Gwatkin and Son are also agents for the Canadian Gordon Card and Job Presses, and the celebrated Hoe Presses. They also deal in second-hand machinery; and execute orders for electrotyping, stereotyping, and engraving at moderate rates. They invite personal inspection, furnish estimates and answer enquiries promptly. Messrs. Gwatkin having had the management of the Printers' Emporium for the past two years for the proprietor, have gained a host of friends among the publishers of the Province by their uniform courtesy and determination to please customers; and we are satisfied that all who may favour the new firm with orders will find them honourable, straight-forward business men. We wish Messrs. Gwatkin every success in their new enterprise.

WHOLESALE STATIONERS.—We call attention to the advertisement of Messrs. James Campbell and Son, wholesale booksellers and stationers, Front Street, Toronto. The Messrs. Campbell keep always in stock a very extensive assortment of everything in their line.

SWITZER AND CHEYNE'S IMPROVED ELEVATOR AND CONVEYOR.—This is a new and improved Grain, Hay and Merchandise Elevator and Conveyor, which is more cheaply constructed than any yet invented, and highly recommended by those whose experience should give their opinion weight, for its durability, strength, and lightness of draught. It is a great economizer of time and labor, and will fully repay its cost in a single season. It is equally adapted to the farmer, the warehouseman and merchant. We wish the inventors success, and hope they will be as successful as the great saving qualities of their machine entitles them to.

BUNTIN, BROTHER & Co., Wholesale Stationers and Paper, Envelope and Blank Book Manufacturers, Nos. 3 and 4, Commercial Buildings, Yonge Street, south of King, Toronto, still continue to uphold the highest reputation among Printers and Publishers as the manufacturers of a superior quality of Printers' Paper. Their stock in General Stationery, Blank Books, Envelopes, etc., is very extensive and varied, and embraces everything required by the trade. Their mills are located at Valleyfield on the St. Lawrence.

STRANGER, at some future time or other, you may be forced to travel to some distant land, and so favorable an opportunity as the present may never be offered of investing in a trunk, or a valise—one of Clarke's best make from No. 86 Yonge Street, will give visitors from the country perfect satisfaction; can also get the most stylish Boots and Shoes in the city at this popular establishment.

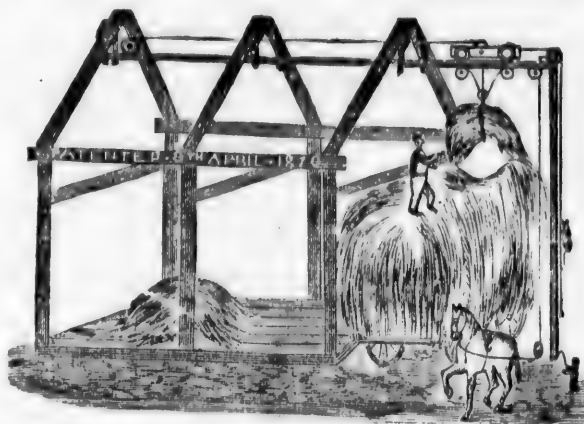

ROOM PAPERS.—Alex. Hamilton, No. 183 King Street East, has on hand a large and varied assortment of Room Papers, Window Blinds, Paints, Oils, English and German Window Glass, Looking Glasses, etc. He fills orders for painting, glazing and paper hanging, with neatness and expedition. Visitors should call and examine his stock, as we are satisfied if they intend to purchase it will be to their advantage.

BRICK MACHINE.—Mr. Wm. Townsley shows a very superior Brick Machine. This machine is considered by those whose knowledge of such matters enables them to judge correctly, to be the best machine of the kind ever offered to the public. It is not liable to get out of order; and is sold at a cheap price.

JEWELRY & FANCY GOODS.—The jewelry and watchmakers' establishment of W. R. and H. Roberts is situated on King Street east, a few doors east of Yonge—north side. In watches, Clocks, Jewelry, Fancy Goods, Silver and electro-plated ware, they show a very large and extensive variety of the best goods. Purchasers can rely on being treated courteously at this establishment.

IMPORTANT TO FARMERS!

WAREHOUSEMEN & MERCHANTS.

SWITZER & CHEYNE'S

Improved Grain, Hay, Merchandize,

ELEVATOR & CONVEYOR.

This Machine consists of a rope and pulley tackle attached to a car running on a track, suspended from the top or roof of any building required for storing grain, hay, coal, or any kind of merchandize. The great advantages claimed for this Machine are its cheapness of construction and erection, its durability and strength, and its lightness of draft. This is a new and improved Machine, for the purposes above named, which will economise time and save labour, and fully recompense the purchaser in one season.

CERTIFICATES can be procured from a number of influential Farmers in the County of Peel who have used this Machine the past season, and in every case it has given perfect satisfaction.

All Orders addressed to SWITZER and CHEYNE,

Patentees, Meadowvale P. O., will be promptly attended to.

LONDON AND PARIS HOUSE.—This well-known establishment has, perhaps, the choicest selection of Jewelry and Fancy Goods, Silver and Electro plate in the Dominion. They are fair and honourable in dealing—and intending purchasers will do well to call.

ONTARIO HOUSE OF FASHION.—The Proprietor of the above establishment has recently added to his choice stock of Millinery and Fancy Goods, a large and varied assortment of Staple and Fancy Dry Goods. This house has long been celebrated for the superior value given to customers; and we have no doubt that Mr. Stead will offer still greater bargains than ever during the Exhibition week. We advise our friends from the country to call at The Ontario House of Fashion, No. 134 Yonge street.

GROCERIES.—This old established concern, corner of Yonge and Alice Streets, has always been favourably known for the superior quality of their Teas and Family Groceries, of which they keep a very extensive and varied stock on hand. Their Wines and Liquors are also of the best brands. Strangers, as well as citizens, will always receive at this establishment full value for their money.

AUCTION SALE OF JEWELRY.—An immense bankrupt stock of Gold and Silver Watches, Clocks, Jewelry, etc., is being disposed of (both by auction and private sale,) every day and evening during the present week, at the store corner of King and Bay Streets (Phillips & Oliver's old stand). Call and examine.

TERRAPIN.—At this popular retreat visitors during the present week can regale themselves with all the luxuries and substantial of the season at reasonable rates.

PICTURE MOULDINGS.—Messrs. Phillips and Oliver have recently disposed of their retail business, and are now devoting themselves exclusively to the wholesale and manufacturing branches. They are now in a position to offer unusual inducements to the trade. We believe in the principle of supporting home manufactures, particularly when we can reap a pecuniary advantage to ourselves thereby, and we consider that Messrs. P. and O. are justly entitled to the patronage of Canadians for building up and fostering an important branch of manufactures in our midst.

ALLCOCK, LAIGHT & Co., Colborne Street, Toronto, and Redditch, England.—We direct the attention of our readers to the business card of this eminent firm, as manufacturers of Needles, Fish Hooks and Tackle, and importers of general Small Wares. They are also importers of the best quality of Machine Needles; and in this particular branch of goods they request an examination of their stock by visitors during the Fair Week. Business men will find it to their advantage to call at their Store, 39 Colborne Street.

ARCHITECTURE.—We direct attention to the card of Mr. Stibbs, Architect, No. 20 Adelaide street, Toronto. Mr. Stibbs executes drawing and specifications of dwellings, stores, churches, &c., in the best style. The present will be a good opportunity for strangers visiting the city to see our Provincial Show, to select suitable plans.

MR. JOHN FENSOM announces that he is prepared to furnish plans and estimates of all kinds of machinery, for mills, manufactories, &c., such as Engines, Shafting, Pullies, Gearing, etc., embracing every recent improvement in the same. He also desires manufacturers of machinery to furnish him with particulars and prices of their Machines. Mr. Fensom is a mechanic of great experience and known ability, and can furnish the best references in every department of manufactures.

ENGINES AND MACHINERY.—Amongst the many firms engaged in this branch of manufactures in this city, that of James Martin & Son takes prominent rank. In recommending them to those in want of Engines, or any other description of Machinery, we speak from experience. The Messrs. Martin have had large experience in connection

with printing machinery, and we can cordially commend them to the craft. They have fitted up the Engine and Machinery for this office, which have given entire satisfaction.

BRASS FOUNDER AND SODA WATER MACHINE MAKER.—Opposite page 28 will be found the business announcement of Mr. H. T. Smith, the enterprising Soda Water Machine Maker, Plumber, Steam fitter, and Brass Founder. He is manufacturer of the celebrated first-prize Marble Soda Fountain, from which the thirsty crowd have been so bountifully supplied, during the present week, at the Crystal Palace. He also makes them in metal. Parties can be supplied with Soda Water Machines, with engine and boiler attached from this establishment, at from \$300 to \$750 in value. Mr. Smith can refer to the testimony of those having these machines in use throughout the Province, the test of actual experience being in the highest degree in their favor. He is also proprietor of the Toronto Steam Soda Water Manufactory, Temperance street, a little west of Bay.

THE MENDON SEWING MACHINE.—The Mendon Sewing Machine, on exhibition at this Fair, is, as its name indicates, the invention of Mr. L. C. Mendon, who has been widely and favorably known to the people of Canada, in connection with Sewing Machines, for the past ten years. The proprietor of this Machine claims for it that it is the best cheap Shuttle Machine in the world, being constructed in an elegant, simple, strong and durable manner, on the combined principle of the Singer and Howe Machines, and doing with ease a range of work from the lightest muslin fabric to the heaviest beaver cloth. It will hem, fell, braid, quilt, tack, frill, gather and cord, and every Machine is fully warranted.

Mrs. Mendon also exhibits the Portable, Adjustable Treadle, by means of which hand machines can be run by treadle power on any ordinary table. Mrs. Mendon always keeps on hand a very extensive assortment of every style and pattern, from the cheapest and most plainly finished, to the most elegant full-cased machine, carved and polished equal to the most costly drawing-room furniture—which, besides its utility, would be an ornament to any household. Mrs. Mendon's large experience as an agent, having tested almost every machine manufactured, and her quickness of perception, and knowledge of all the parts of the machine, and its working, give her a decided advantage over any sewing machine agent we know of in Canada. Lady purchasers will have the benefit of her large experience in selecting and learning to operate; and as Mrs. M's. integrity and honorable, straightforward manner of doing business, has gained for her the present large custom, we can testify that she will not hesitate to tell you any defects, or inferiority one machine has over another, even among her own stock. Were we a lady purchaser desirous of learning to run a machine, we would not hesitate to pay a considerable extra sum for having the advantage of Mrs. Mendon's instructions; although the fact is, you can purchase to the greatest advantage at her store. The ornamental work imitating beasts, birds and flowers, in great novelty without any pattern, and which can be seen and examined at her store, or at her stand at the palace during the present week, is a peculiar talent of Mrs. M's. and to which few have the genius to attain. Machine needles of every description kept in stock, and machine sewing and pattern executed promptly at moderate rates. Mrs. Mendon's places of business are 3 Rossin Block, Toronto, and 81 James street, Hamilton.

DENTISTRY.—Those requiring the services of a Dentist, will find Dr. Trotter a gentleman fully up in his profession. The highest testimonials of those who have experienced his treatment speak of his ability and great caution in the careful manipulating of the teeth. From his card on another page, may be learned some new and important improvements in the dental art, which he is now introducing.

THE HOWE MACHINE.—The Howe machines are celebrated for doing the best work, with a much smaller needle for the same thread, than any other; and for beauty and firmness of stitch, alike on both sides of the seam, they cannot be surpassed. They are the best braiding of any machine, and the hemming and felling work produced testifies to their excellence in these branches. The machine presents a remarkably handsome appearance, and is strong and substantial, being case-hardened and constructed of the best material and exquisite finish. Any machine can be fitted with the extras, a feature which is peculiar to this make. Messrs. Dorris & Whitlark, 117 Yonge Street, are the Toronto agents for this machine.

PROVINCIAL LAND SURVEYORS.—We have great pleasure in calling attention to the card of Messrs. Wadsworth and Unwin, whose office is situated on Adelaide-St., opposite the Court House. They are capable and honorable—matters of no small consideration with parties desiring their services.

WHOLESALE STATIONER AND BOOKSELLER.—Mr. A. S. Irving always keeps in stock the best and most popular literature of the day, as well as beautiful editions of all the standard authors; and can supply any newspaper, magazine or periodical published in America or Europe, on the best terms, and on the shortest notice. Mr. Irving's experience and great facilities peculiarly entitle him to the patronage of the literary.

THE BAZAAR.—At the Bazaar, 194 Yonge street, opposite Globe Hotel, will be found a very extensive assortment of glassware, toys, presents, fancy goods, &c., which is now being disposed of at very low rates.

CITY BATHS.—This extensive establishment is now in excellent order, and its popularity since it came into the hands of Prof. Harley speaks in the highest terms of the enterprise of this gentleman. His shaving and hair-cutting saloon is attached to the establishment; and a lady hair-dresser is also on hand for shampooing and curling ladies and children's hair; or ready to wait on families in the city for that purpose.

REGENT HOUSE.—Messrs. Janes, Brayley and Newcome, of the "Regent House," 51 King street east, are now offering the greatest bargains in Dry Goods, Millinery, Mantles, etc. Visitors are requested to call.

SAFES.—J. and J. TAYLOR, manufacturers of fire and burglar-proof safes, Palace street, Toronto, make a very fine display in the above line at the present exhibition. Their stock will well repay an examination from those interested.

JOB PRINTING.—The type and machinery of Bell, Barker & Co's Office are of the latest style, from the best foundries; and everything being new, they have unusual facilities for doing the best printing at the lowest rates and with great expedition.

CURRIE BOILER WORKS.—The above establishment, located on the esplanade, is complete in all its departments. The machinery used is of the very best kind, and fitted up with all the latest labour-saving improvements. Boilers for marine and stationary engines; iron ships, iron bridges, stills, iron agitators, tanks, &c., are here manufactured. Mr. Currie imports his boiler plate direct from Great Britain, and keeps always on hand a large stock of fire-brick, angle-iron, &c. He has attained a deservedly high reputation throughout Canada for the superior quality of the work turned out of his establishment.

DRUG STORE.—Mr. J. W. Jenkins, keeps always on hand a superior stock of everything in his line, at his store, No. 149 York Street.

ISLAND FERRY.—The favorite steamer "Bouquet" makes regular half-hourly trips to Mrs. Parkinson's on the Inland, during the season. Our friends can in no other way spend so pleasant an afternoon as amid the attractions of the Island, not the least of which is the fashionable hotel of Mrs. Parkinson, where visitors and tourists will receive every attention.

LONDON BUSINESS CONCERNS.

LONDON WHITE SULPHUR SPRINGS.—This popular bathing establishment is located on the banks of the Thames, at the west end of Dundas Street, London, Ont. The Spring, flowing at the rate of 1,000,000 gallons a day, upwards of 1000 feet from below the earth's surface, is equal to any mineral water known for its medicinal and lavatorial qualities. It is invigorating and purifying to the system; and many of the citizens of London, and others, have experienced its beneficial effects in the cure of diseases, which had baffled the skill of the medical profession. A ladies' department is handsomely fitted up, and an experienced matron is always in attendance. Mr. Dunnett, the proprietor, deserves the thanks of the citizens for his enterprise. Both departments are under the most trustworthy and systematic management; and there is an air of cleanliness and comfort observable, which will compare favorably with any similar establishment in America. Mr. Dunnett has spared neither pains nor expense in adding to the attractions of the place. Handsome pleasure grounds have been laid out the past summer, and the buildings enlarged and beautified, and the bathing facilities greatly increased. We have seen an analysis of the water—and the ablest medical men bear their testimony to its highly curative qualities. The popularity these springs have attained during the past summer is surprising to the Londoners, who have witnessed the great relief afforded to the sufferers who have bathed in, or drunk, the healing waters. Many Southern tourists have availed themselves of the superior hotel accommodation, and the invigorating and salubrious climate of the "Forest City," instead of remaining at Saratoga, as has been their custom in former years, they having greater confidence in the curative effects of the London White Sulphur Springs. We know of no other way in which the debilitated and rheumatic can so speedily regain health and vigor as by a few weeks' sojourn at these attractive quarters.

THE CANADIAN BUILDER.—The above able expounder of the industrial arts and architectural science, has been greatly enlarged and improved in the past year; and the publisher offers great inducements to subscribers. The reading matter is judiciously selected, and always interesting, and the editorials are able and practical, encouraging as they do, a spirit of progress, economy and thrift. Thomas W. Dyas, C. E., London, is the editor, and the subscription price is only 50 cents per annum.

CARRIAGE WORKS.—W. J. Thompson, Carriage and Waggon Maker, opposite "Smith's Block," Dundas Street, London, keeps always on hand, a large assortment in the above line. Every article is made of the best seasoned timber, and warranted. Mr. Thompson makes a very fine display at the present Exhibition of light buggies, top buggies, carriages, skeleton waggons, sulkies, which will well repay visitors for an examination, and to those requiring anything in this line, he can offer the best inducements to purchase.

CANADIAN BUSINESS CONCERNS.

MESSRS. ANGUS, LOGAN & Co., 278 St. Paul St., Montreal, do a very extensive business in the manufacture and importation of paper and stationery. Having now in operation four mills, two at Sherbrooke and two at Windsor, Qc., they are able to turn out six tons of paper per day. They manufacture all descriptions of coloured, book and news printing papers; grey, brown and manilla wrapping papers, also match paper and roofing felt. They also import largely of all kinds of foreign stationery. From the extent of their business, they are enabled to offer as favourable inducements to purchasers as any house in the trade, and we cordially commend them to the public.

NORTH'S PATENT DRUM HEATER.—The patentee, Mr. North, received a diploma for this great economiser of fuel at the Hamilton Exhibition of 1864. The "Heater" can be applied with equal advantage to either coal or wood stoves. Health, comfort and econ-

ings,

omy are the results of its use. The heat it saves effects a great saving of fuel, while the uniformity with which every part of a room is heated is another recommendation in its favor. To have, by its means, a room sufficiently heated, it is unnecessary to heat the stove to a red heat, thereby injuring the air near the stove, while the remote parts of the room have to be heated by radiation, as it creates a current whereby all the air in the room is raised to the degree required—uniform heat, comfort and enjoyment are the results—at no additional expense. We cheerfully recommend the "Heater" to those to whom a smaller bill of fuel is an object of any consideration. Mr. North's establishment is located at 60 McNab street, Hamilton.

IRWIN'S PATENT WASTE STEAM HEATER.—We would call the special attention of machinists and all using steam to any extent of power, to this valuable and much needed invention. By its use incrustation and corrosion in the boiler is prevented; and it effects a saving in the fuel used of fully 30 per cent. It will be noticed in connection with the advertisement on another page, the certificates of such men as Mr. Gibbs, President of the Oshawa Cabinet Factory, and others are given, from which may be deduced the fact that it does much more than the inventor claims for it, in effecting a saving of fuel—a very desirable condition to all using steam engines. Parties ordering should send number of horse power of engine, etc., to Mr. Irwin, Oshawa, who will answer all inquiries promptly. Parties may place the highest reliance upon Mr. Irwin's integrity; as the Waste Steam Heater is not one of these catch-pennies which so often are gotten up to gull the public. The machines have been fully tested, and we have the best evidence in the experience of practical men of their great utility.

ODDFELLOWSHIP.

INDEPENDENT ORDER OF ODDFELLOWS, (BALTIMORE UNITY).—The rapid strides which this institution has made in Canada during the last few years, and more especially in Toronto, demand more than a passing notice. On the 14th January, 1868, through the exertions of a few members of the Order then resident in Toronto, a dispensation was granted for the formation of the first Lodge. Sanguine indeed, though the hopes and expectations of the projectors were, little did they look for that realization which, to-day, proves, that from small beginnings great results often flow, and though we do not by any means consider the work yet done (for we trust to see a still further increase,) yet we think that a mention of the figures at which they have even now arrived goes far to establish the position that there is every reason to expect that the Baltimore Unity Oddfellows must soon become an institution in our midst, calculated to wield an influence for good, and make itself recognized by the prominent position which it is fast assuming through the length and breadth of our land.

The following figures show the present membership:

Canada Lodge, instituted in Toronto, Jan. 14, 1868,	now members	131	members.
Covenant Lodge instituted in Toronto, Oct. 22d, 1868,	" "	137	" "
Queen City of Toronto, instituted March , 1870,	" "	62	" "
Toronto Encampment, instituted June 28, 1870,	" "	25	" "

In justice to those through whose energy and influence these lodges have been instituted, we subjoin the following list of the Charter members of Canada, No. 49, the Mother Lodge of the Baltimore Unity Oddfellows, in this city. J. J. Ramsay, N. G.; W. R. Roberts, V. G.; M. Blume, Sec.; J. Richardson, Treasurer; Lipman Walters, I. G.

The three Lodges and Encampment, (which have been organized within three years) are all in a prosperous condition—making weekly additions to their lists of members.

The elective officers at present filling the various posts, and installed last July, are as follows:

CANADA LODGE, No. 49.—J. G. Coleman, N. G.; J. B. How, V. G.; W. Menzies, R. S.; Dr. R. Emery, P. S.; T. A. Thompson, T. Meets every Friday evening in Masonic Buildings, Toronto Street.

COVENANT LODGE, No. 52. F. T. Barker, N. G.; — — Murdoch, V. G.; Samuel Gell, R. S.; W. C. Davis, P. S.; John Taylor, T. Meets every Tuesday evening in Masonic Buildings, Toronto Street.

QUEEN CITY LODGE, No. 56. Jno. Fields, N. G.; J. W. C. Bedson, V. G.; R. G. Thoms, R. S.; Jno. Leachley, P. S.; John Roberts, T. Meets every Thursday evening in the Masonic Buildings, Toronto Street.

TORONTO ENCAMPMENT, No. 8. — C. P., Hugh Blain; H. P., J. M. Wingfield; S. W., W. Mulock; Treasurer, F. T. Barker; J. W., R. L. G. Wickett; S. Ross, M. E. Suider; F. Scribe, A. T. Gowanlock. Meets every alternate Wednesday in Oddfellows Hall.

D. D. G. M., for the Toronto District, Hugh Blain, Toronto.

Before leaving this subject we think a few statistics in connection with the present position of the Order in some other jurisdictions, in the United States, would not be amiss.

In looking over the report of the Grand Lodge of the United States, which has just concluded its sitting in Baltimore, we find the following startling facts in connection with numbers and financial position of the Order:

Number of Lodges and Encampments.....	2,000
Members estimated for past year in membership.....	21,000
Present number of members in connection with established Lodges.....	700,000
Total number of members relieved during past year.....	29,000
“ Widowed families relieved.....	4,000
Amount paid for relief of members.....	\$853,000
“ “ “ Widows.....	\$127,000
“ “ “ Education of Orphan.....	\$20,000
“ “ “ Burying the dead.....	\$144,000
Total relief.....	\$1,144,000

The total annual receipts in the two branches of the Order, reached this year, the enormous sum of \$3,100,000. These figures need but little comment, showing as they do, not only the financial ability of the Order, but, also, the large amount of good, which, when the opportunity permits, it is capable of accomplishing. We wish its promoters every success in this jurisdiction; and trust the time is not far distant when the Dominion will, like Pennsylvania, be able to count her seventy-five thousand members, and her yearly revenue of seven hundred thousand dollars.

The following are the names and addresses of the Officers of the Grand Lodge of Ontario:

Most Worshipful Grand Master,	W. N. Ford,	St. Mary's.
Right Worshipful Deputy “	John Gibson,	Stratford.
“ “ “ Warden,	J. J. Ramsay,	Toronto.
“ “ “ Secretary,	J. B. King,	Brantford.
“ “ “ Treasurer,	A. D. Clement,	“
“ “ “ Representative,	James Woodyatt	“
“ “ “ “	Thos. Partridge,	London.
“ “ “ Conductor,	Wm. D. Kennedy,	Toronto.
“ “ “ Marshal,	Thos. Reid,	Windsor.
“ “ “ Guardian,	A. McPhail,	London.
“ “ “ Chaplain,	C. F. Hanson,	“
“ “ “ Herald,	M. Blume,	Toronto.

The meetings are held, at present, in the Oddfellows Hall, Masonic Buildings, but about the end of October, a new, large, and beautifully fitted up hall, intended for the accommodation of the many Unfraternity Lodges and Encampments will be opened. It is located on the corner of Yonge and Albert streets. Great preparations are being made by the Dedication Committee for a grand demonstration on that occasion as will reflect credit on the Brotherhood of the City. Kindred and related members of the Order from distant points are expected to be present and nothing will be left undone to render the occasion one of interest and profit.

LONDON WHITE SULPHUR SPRINGS.

THIS WONDERFUL ARTESIAN SPRING

Is situated on the bank of the River Thames, in the CITY OF LONDON, Ont. The Well is one thousand and eight feet deep, and flows without ceasing at the rate of 1,000,000 gallons of Pure Sulphur Water per day.

The Medical virtues of these Waters have been fully tested by the ablest Medical Men, and found to possess the most valuable curative power yet discovered for dispelling many diseases.

THE GROUNDS ARE BEAUTIFULLY LAID OUT WITH WALKS, SUMMER HOUSES, FISH PONDS,

And every convenience and comfort for Invalids, as well as the pleasure-seeking public. There are BATH ROOMS nicely fitted up for Ladies and Gentlemen; HOT and COLD BATHS, SWIMMING BATHS, SHOWER BATHS, SITZ, SPRAY, and DOUCHE BATHS.

Diseases Treated and Cured by the use of the Baths and Waters :

Rheumatism, Gout, Scrofula, Skin Diseases, Dyspepsia in all its forms, Diseases of the Liver, Stomach, Kidneys, and Urinary Organs, Hæmorroids or Piles, Nervous Prostration from the abuse of stimulants and opiates.

First-class Hotel Accommodation for visitors and invalids can be had at reasonable rates in the City. The Springs can be reached from all parts of the Continent by rail, being on the lines of the Great Western and Grand Trunk Railways of Canada.
